TLAČNO LITJE, MEHANSKA
OBDELAVA, RAZVOJ, SESTAVA

CPF LUKEK History

1983 – founding of the firm for production of smaller metal items for textile and shoe industries;

1984 – we become the first producers of clips for fur clothing according to the “keska system” (patented model of a clip that allows machine sewing);

1985 – the company begins production of window mechanisms (Klik-Klak) for mobile homes for the Adria-Karavan company (now Adria Mobil);

1989 – the company begins Die casting of non-ferrous metals, including the development of its own tool production (development of company's own tool room); the production of spindle screws for lifting mechanisms with trapezoid threads for TPV d.d., Slovenia;

1992 – the company expands to foreign markets: zinc alloy clamps for MAN Steyr AG, Austria; fitting elements for ventilation systems for AL-KO Therm GmbH, Germany;

1993 – production of hand brakes for bicycles and regulating screws for Saccon srl, Italy;

1994 – construction of a PI facility in Trzin (3 storeys, 1800m²), production was moved outside the home base;

1996 – the firm acquires a new business partner Wampfler: spacers for guide tracks on transport lines;

1997 – the firm relocates to the new industrial premises (the facility at Trzin was changed into an office and commercial building);
